

## **Notice of Utility Tariff Filing**

The REGULATORY COMMISSION OF ALASKA (Commission) gives notice that Golden Valley Electric Association (GVEA) filed TA363-13 proposing changes to its Net Metering program. The Net Metering program (GVEA calls it the Sustainable Natural Alternative Power (SNAP) Plus Program) allows members to generate their own electricity from renewable resources and feed electricity they do not use back into GVEA's system. Currently, the total nameplate capacity of all net metering members combined is 3.0 percent of GVEA's average retail demand. Due to an increased interest in the SNAP Plus Program, GVEA believes it is possible that the present capacity limit of 3.0 percent, which equates to 4,261.69 kWh, may be exceeded in the coming year. To ensure new interconnections are allowed to connect to the system, GVEA is requesting the total nameplate capacity be increased from 3.0 percent to 5.0 percent of GVEA's average retail demand.

This notice does not contain all requested revisions and the Commission may approve a rate or classification that varies from those proposed.
